Plan of Study

Every degree student must file a program of study in the Graduate Office for approval by the Graduate Director of Nutrition. A program of study is a list of courses that satisfy degree requirements, and it must be approved by the graduate director. This formal agreement serves a number of purposes that benefit both the student and the University. It causes the student and advisor to engage in early planning with a specific goal in mind; it provides useful information for the planning of course offerings; it facilitates subsequent advisement; and it protects the student in the event of unexpected curriculum or faculty changes. Although programs of study are binding, they can be modified when conditions warrant.

Programs of study should be filed as soon as possible after the other paperwork has been submitted so your matriculation can be completed.
